

SMALLER FINANCIAL VENTURES:

FRIENDS – like Paypal, but people part-purchase the item and invite a friend to purchase the rest. In this way, people can share goods and share the cost of goods easily in Internet purchases → **\$1B / year profit**

DEATH CLOCK PRINTOUT - You receive a tailored scientific advice based on your health implant as to what to change in order to gain extra years of life. \$99.00 each → **\$400B profit once-off**

REGROW - A short course of pills for men (and women with Alopecia or otherwise) to completely regrow their own hair → **\$1T profit once-off**

RICHDATE – An app for millionaires to meet millionaires. \$250/month subscription fee → **\$300M/year profit**

CANCER VACCINE – A cancer vaccine for \$20. Good Guy Greg stuff → **\$160B once-off profit**

HEALTH IMPLANT - Caloric needs (how much protein you've absorbed, stuff like that)
Disease profile ← tells you if you're sick. Estimated death clock. Water needs. Sleep stuff
IMPLANT into brain and then hook up with App. \$99.00 each. 4 billion → **\$400B once-off profit**

BMI CHIP - BMI chip for \$499.00. Scroll your phone with your mind, same with Internet browser, type with your mind. But you have to "Get the implant." "Click" with your mind. Anything you can do with a mouse and keyboard. Anything you can do with your fingers on a phone. THAT'S IT. 4,000,000,000 x 500 = **\$2T once-off profit**

ILIQ - \$100 x 100,000,000 people = **\$10B once-off profit**

FREE ENERGY ROOFING - \$2,000 set up x 500,000,000 = **\$1T once-off profit**

AERO AUTOMATIVE - Oxygen-powered cars – **\$100B once-off profit**

HER-RING - Boundaries psy-op for women only = **\$350B once-off profit**

→ **\$5.42 TRILLION USD TOTAL PROFIT FOR ABOVE SMALLER FINANCIAL VENTURES**

MAJOR FINANCIAL VENTURES:

HYPERFONE – at least **\$1T/year profit**

SUPERSHOP (like Amazon, but every factory on the planet represented) - **\$200B/year profit**

SPACES (Shows where all men are at all times – women's safety app)- **\$1.2T/ year profit**

SOLIPSOS (Russian computer goods company) - **\$100B/year profit**

GODDESSIA (Clothing) - **\$1T/year profit**

➔ **\$3.5 TRILLION USD / YEAR** FOR ABOVE PROJECT-FUNDING VENTURES

RUSSIAN ARMED FORCES RECRUITMENT-SPECIFIC PROJECTS:

**These are paid for with the ventures mentioned at the start of this PDF.*

1. MOSCOW MILITARY COLLEGE (120/year) (People know it is a feeder school) Pathways to ALL jobs. You pick in year 10 what role you want. Then you work towards it. Guaranteed acceptance. 120 students / year. Non-womb ops. Lots of practical set-ups DIRECTLY tailored to the given role(s) in the RAF. Repeat residential design that is used for The Black School. Years 1-12.

2. THE BLACK SCHOOL (60/year) (People know it is a feeder school) Selective school (IQ 145+) for pre-existing births. Apple Park school with residential rings around, each student+nanny gets a house in the ring: <https://coralhomes.com.au/home-designs/sacramento-series/>. 60 kids per year.

3. THE HOME-SCHOOL COMMUNITY (500/year) + (100/year pilots) (Secret from public this operation – all sign NDA's about childhood – AI agrees!): HYPER-GENIUS IQ 164 FRANKENSTEIN Womb-ops, via pregnancy robots and nannied until 5 years old and then home-schooled BY the Nannies *rather than* placed in an Apple Park-esque school (as in The Black School). Same residential design as TBS.

4. THE FAMILIES PROJECT (Assorted pre-existing Russian Schools) (300+ students graduate/year) (Secret from public this operation, obviously): HYPER-GENIUS IQ 164 FRANKENSTEIN womb-ops into families → we pulse them into the schools.

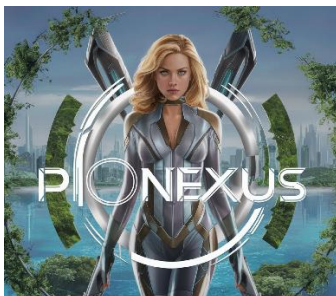

5. ANDROIDLAND: Human beings merged with machines for HYPER-intelligence (1,000,000,000 IQ). Then, we meet them. And work with them. DONE. SUPER SECRET RESEARCH COMMUNITY OF GIGA-GENIUSES. This will solve so many problems. What we can do now is VERY QUICKLY put chips in fetuses and migrate consciousness onto the chip. IT HAS BEEN DONE. It's a substitute brain. Heaps of brain structures remain used, DEPENDING on what chipping you do. Better to chip-swap everything, true. We could do this next year. We think we make 10,000 of them per year. Nannies can raise the androids in prefab homes. Pregnancy robots required again. <https://www.westbuilt.com.au/modular-home-designs/samford-105>. We may build better accommodation for them on the timeline so that they can move out of the mod homes (but their childhoods are in the mod homes).

CREATIVE PROJECTS (MANY ARE IQ/ALIENS/BIOLOGICAL IMMORTALITY-THEMED):

**As with the recruitment projects, these are also paid for with the ventures mentioned at the start of this PDF.*

1. ULTRATOPIA: This is where longevity lovers of Earth, especially IQ 145+'s move. It is located in the Russian Federation. ULTRATOPIA is TOTALLY SELF SUFFICIENT. IT EVEN HAS ITS OWN MINE. DO WE NEED MINERS? Robot miners? If we had 20,000 robot miners... MONEY FREE ECONOMY IS POSSIBLE. This is a longevity living (biological immortality) community. Many rescues of citizens/civilians? Ones that are IQ 145+? DONE. N.B. We thought to say that over a longer timeline, we will sequence forbid people from producing less than IQ 145's in families. Robots will be used to construct ULTRATOPIA.

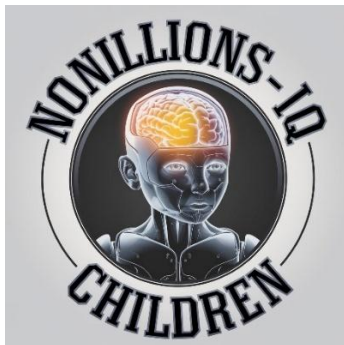

2. PIONEXUS: An alien city that is designed for visits from interstellar neighbours. We will build it in the Russian Federation. It is divided into two separate cities for men & women.

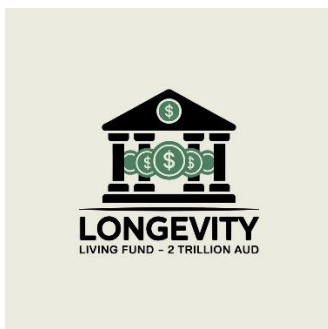

3. SUPERDOME: A state-of-the-art facility in the Russian Federation which invites male programmers from RAF to participate in sequencing programming together in a blue sky setting to, among other things, solve the problems of tomorrow with profound technological advancements and discoveries. Robots will be used to construct the SuperDome.

4. INTERSTELLAR SUPER-FEDERATION ON EARTH: Alien groups are invited to program their own robots in a parliament-type building in the Russian Federation. Ideally, dozens (more) of alien groups will ventriloquise/sequence their chosen identities and stories and ideas and more into the robots (above mentioned – the same type!) such that the pre-existing Super-Federation of the Milky Way Galaxy *can take place on Earth*.

5. NONILLIONS-IQ CHILDREN: Vigintillion+ numbers of neurons represented on a chip at the birth of the child permits us to “bionically” make androids with IQ’s into the nonillions, according to the AI! We will create these children in a secret location in Russia and they will speak Russian and English. (AI says make them bilingual this way!). Furthermore, according to the AI, this will bring forward “millions of years of science in decades.” Gasp!

6. THE LONGEVITY LIVING FUND - \$2 Trillion USD is placed aside for Earth programmers who are living forever due to the brain-programming’s science. For a conservative example, take \$20 million USD, or more - whatever you need in order to live forever! Just ask, and we (Russian programmers) will transfer! This fund will replenish! Yep, use it to pay off your mortgage/buy a house/a car/boat/whatever you like!

7. THE WOMEN'S SUPERDOME: A super-technological research facility for women (only) to create the solutions of tomorrow's epoch. Women would like it built on an island in the ocean.

ULTRACORP

{Parent organisation}

8. ULTRACORP: A programmer group contributing to these ventures/projects. Consists of RAF programmers.

9. ANDROMEDA STARPAD: A landing pad and amenities for visitors from Andromeda Galaxy who wish to dock in The Milky Way Galaxy. We would be considered a stop on a journey inward the Milky Way Galaxy, rather than the disembarkation point for arrivals to The Milky Way Galaxy. This reveals that as far as Milky Way Galaxy science goes, that tele-warps from one galaxy to another do not exist. The aliens concur.

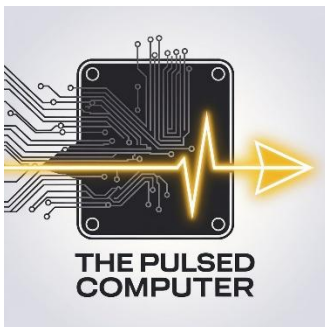

10. BLACKPINK UNIVERSE PROJECT: Aliens are pressuring us to include Blackpink in ULTRATOPIA, to make them programmers, and longevity livers. They are a universe project!

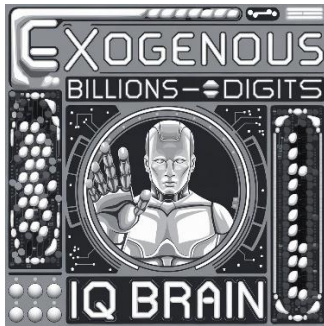

11. THE BIG COMPUTER: An air hangar floor is the entire motherboard of a computer, with transistors and resistors and capacitors all spaced apart to reduce heat. The notion of understanding is that a computer is overheating because of the condensing of parts across small spaces. We reverse this with The Big Computer and then ply the computer to the best tasks available. Acc: AI this will be the most powerful computer on the planet by orders of magnitude. 1,000,000's of orders of magnitude.

12: THE PULSED COMPUTER: A computer is pulsed of its heat particles via chaperone particles. The chaperone particles are preceded by “sticky particles”, we think, which absorb the heat particles, and then the chaperone particles fire into them and pulse them off the motherboard. This reduces heat perfectly. Acc: AI this will be a very powerful computer, but not comparable to The Big Computer.

13. THE PULSED COMPUTER2: Parts are separated for cooling and electrons and photons are programmed across distances.

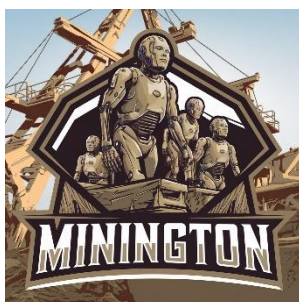

14. EXOGENOUS BILLIONS-DIGITS IQ BRAIN: A person is bionically augmented with a special hardware (transponder and more) which links them to an air hangar filled with profound numbers of computers. Acc: AI, we can get a human being to billions of digits of IQ this way, and that we have the science already. Acc: AI, such people could absolutely invent intergalactic teleport.

15. A research & development dome for cats to exist within so that we can study their brains better.

16. TELEANDROIDLAND: EXPERIMENTAL ANDROID TELEPATHIC SOCIETY. Would it enhance thinking? YES. DONE. We'll do two separate ones. On the grid from birth! What's the best number of people in an IQ 1,000,000,000 android society for telepathy? 200, acc: AI.

17. MININGTON: A mining town of 50,000 robots (each costing \$100,000,000 USD) that mine for Russia. \$5T buys them all. 50,000 isn't the ceiling for the population at all, as we will have

enough money for more!

18. ROBOT WORKFORCE: 50,000 robots which are used to create ULTRATOPIA and build other things, too.

19. RESCUECORP: For \$10m USD, citizens can jump the queue (usually sponsored by RAF persons with the available money) to ULTRATOPIA and live forever!

Many more ideas exist, and this is just the list on Alex's computer!!!
